Subject: Dynergy Comments on the Update to the Station Power Protocol for MRTU

Ms. Miller:

Thank you for the opportunity to provide comments on the CAISO white paper on the Update to the Station Power Protocol for MRTU and for all of your help in expanding our understanding of the three scheduling/settlement options list in the document.

After review of this document, we believe that Option #2 - "Settle both on-site and remote Station Power Load at the resource specific LMP at a Custom LAP and settle load supplied by a Third Party at the Default LAP" is the most viable alternative.

We look forward to working with you on this issue and are committed to actively participate in this process. If you have any questions or concerns, please contact me at (408) 204-7630.

Best regards,

Ali Amirali
Managing Director - Dynergy Power Marketing
