

MRTU IMS Update 2 Status Report

August 25, 2008

Executive Summary

The CAISO made several updates over the weekend, including Master File version 23.9 on Friday for DA and RT Markets starting with Trade Day 08/23/2008. This will allow Participants to validate several additional Charge Codes.

The DA Market ran within timelines on Wednesday and Thursday, August 20-21, but was delayed on Friday, August 22. The RT Market on August 21-22 was successful.

All Day-Ahead Market Results found in CMRI and OASIS for Trade Date 08/26/2008, except for the OASIS report Transmission Interface Usage, were available as of 12:22 p.m. Pacific. The CAISO completed Post-Market Validation of Day-Ahead Market Inter-SC trades as of 12:24 p.m. Pacific.

Issues Identified and Market Participants' Comments

Please see the Daily Issues Report posted at <http://www.aiso.com/1c96/1c96acdd1d710.html> for a report of the new and updated issues from yesterday's activities. The CAISO will update this report daily and post it at the start of each day.

In addition to the issues identified, there were a few other items raised which require follow up by CAISO:

- One Participant reported that statuses in SIBR did not roll over correctly. This was related to the Master File refresh issue. The CAISO noted that this was related to the Master File refresh installed over the weekend and should not recur.

Issues Resolved/Responses Provided

- The CAISO plans to do internal SLIC testing this week. Depending upon the success of this testing, it may also test specific Charge Codes in which case it will notify the affected Market Participants.
- The CAISO's goal for market simulation testing this week is to achieve stability and meet the target DA market posting time line and the 90% Real Time solution success rate.
- All constraints are being enforced except the Forbidden Region. The Forbidden Region in Real Time will not be a part of this week's stability and performance goals.
- Participants should expect the Real Time Data Exchange Reports to be posted on the day after the relevant Trade Day.

Plan for August 26, 2008

- Continue with semi-structured testing. Participants may submit whatever Bids they desire.
- Conduct IMS U2 “Touch Point” conference call via the number below at 9:00 a.m.

Market Simulation Conference Bridge
Open 7:00 a.m. to 10:00 a.m. Pacific
Call In Number (866) 205-4243
Passcode 2012446
