**Transmission Rights and Interests**

Path 15 Project Facilities

Western is a participant in the Path 15 Upgrade Project, which will consist of a new, single, 83-mile, 500-kilovolt (kV) transmission line and associated substation facilities extending between the PG&E Los Banos Substation in the California Central Valley (the northern terminus of the Project) and the Gates Substation (the southern terminus of the Project), including modifications at the substations to connect the line as well as reconfigurations to the Gates – Midway 230-kV line and the 115 kV line north of Midway. Voltage support facilities will also be added at the Los Banos and Gates Substations as part of the Project. Western will own the portion of the Path 15 Project Facilities consisting of the 500 kV transmission line between the Los Banos and Gates Substations.

Under the terms of the Letter Agreement (LA) approved by the Federal Energy Regulatory Commission and under the provisions of the Construction and Coordination Agreement (CCA) entered into by the Path 15 Upgrade Project participants, each participant will receive an allocation of “Transmission System Rights” in the Project. Western’s allocation of Transmission System Rights under the LA and CCA is as follows:

Allocation	10%
Capacity	150 MW (Based on an estimate of 1,500 MW)

Western is turning over to ISO Operational Control all of its rights and interests in both its ownership of the Project facilities and its contract Transmission System Rights.
